

# Stolen and Otherwise

An Oklahoma editor fired six shots at a man who had refused to pay \$4 on his subscription. It takes an expert with a gun to hit a little thing like that.

The Bandera Americana says: A franchise has been granted to Mr. Cromwell to build an electric railway in Albuquerque and the road will be constructed within a year.

The prosecuting attorney who is compelled to fight a supreme court as well as a band of official thieves has a hard task serving the public, says the Kansas City Journal.

The pistol totter continues to get in his work in Texas, the average daily dead being about one man, worse than in the Philippines. The weepers over the Filipinos should have a few weeps over some home killings.

The announcement is made that all underground men and car men employed in the mines at Santa Rita, N. M., are to receive an advance in wages of 50 cents a day. The arrangement is that the new scale shall continue as long as copper remains at the present price.

Fruit growers who have examined the buds say the recent cold spell has not injured the fruit. Some tender garden vegetables were slightly damaged, but that is about the extent. Reports like the above, taken from the Farming Hustler, are coming from all parts of the southwest, proving that cold spells and even light frosts in this dry climate do not injure fruit as in other parts of the country. For fruit as for every thing else, the great Southwest has no equal.

In the press censor law, recently enacted by Pennsylvania, the foreign newspapers are finding essence of intolerance to talk about. The German press comment is not calculated to inspire confidence in the measure, for the character of their condemnation is such as to make an American blush: they say it is "only fit for Russia and not for free America."

The Department of Agriculture has just issued a bulletin exposing the methods of certain seedsmen. Some of them have been advertising pearl millet at prices varying from 12 to 35 cents per pound and "Pencilaria," "Maud's Wonder Forage Plant," etc., at prices varying from 40 cts. to \$1.50 per pound the alleged novelties at the highest prices being identical with the pearl millet sold at lower figures.

Until bullfights became a constant Sunday amusement at Juarez, just across the line from El Paso; the statement that the bullfight appeals to the Spanish blood alone would have been accepted, but it seems to suit the American temperament mightily, for many times, the number of Americans present at the Juarez bullfight is greater than the number of spectators of Spanish blood—and the bullfight can draw a bigger crowd than the baseball game.—St. Louis Globe-Democrat.

**Tuberculosis Among Miners.**  
In a lecture delivered by Dr. Stewart Cowen in Victoria, Australia, it was stated that nearly one-third of the deaths among adults in the town of Eaglehawk, Victoria, were due to tuberculosis. Of thirty three deaths of men engaged in mining, more than one-half died of this disease, whereas among men not engaged in mining not one in nineteen died of that scourge.

These figures clearly show that miners are more prone to consumption than men engaged in general occupations above ground.—Mining Reporter.

**No More Wine.**

San Francisco, May 2.—The grand commandry Knights Templar of California has decided by unanimous vote that hereafter no wine will be served at Templar banquets. The innovation has been introduced, it is claimed, so that the order on this coast might fall in line with the general movement of the same kind in the east and because the use of wine in the lodge rooms for all official functions is contrary to the principles of Masonry. It is said that the grand lodge of Masons at its annual meeting next October will take the same decisive action and order that all banquets given under auspices of any Masonic lodge of the state be strictly temperate.

**For Those Who Live on Farms.**  
Dr. Bergin, Pana, Ill., writes: "I have used Ballard's Snow Liniment; always recommend it to my friends, as I am confident there is no better made. It is a dandy for burns." Those who live on farms are especially liable to many accidental cuts, burns and bruises, which heal rapidly when Ballard's Snow Liniment is applied. It should always be kept in the house for cases of emergency 25c, 50c, and \$1.00 at J. P. Byron & Son.

**Stands by New Mexico.**

The Santa Fe New Mexican is authority for the statement that Senator W. H. Andrews, before starting on his present trip to the territory, visited at Washington in company with Senator M. S. Quay of Pennsylvania, and had an interview with the secretary of the interior, for the purpose of procuring a share of the appropriation for the immediate construction of reservoirs and an irrigation system for New Mexico. Senator Quay informed the secretary of the interior then and there that he would make it his business to see that New Mexico was not neglected any longer in this important matter. Everybody knows that the senior senator from Pennsylvania is a "stayer."

The secretary of the interior promised to look into the matter at once and apportion part of the appropriation to New Mexico if this could possibly be done. The outlook for the recognition of New Mexico's rights and necessities in this line, says the New Mexican, is becoming brighter.

**World Wide Reputation.**

White's Cream Vermifuge has achieved a world wide reputation as being the best of all worm destroyers, and for its tonic influence on weak and unthrifty children, as it neutralizes the acidity or soreness of the stomach, improves the digestion and assimilation of food, strengthens their nervous system and restores them to the health, vigor and elasticity of spirit natural to children. 25c at J. P. Byron & Son.

**Quarantine Raised.**

W. H. Greer of Deming, who is a member of the Cattle Sanitary board of New Mexico, and who was in Silver City yesterday, while here was the recipient of an important telegram from Capt. J. A. LaRue, secretary of the territorial board.

Captain LaRue wired that he had received word from Dr. Salmon, chief of the Bureau of Animal Industry, saying that the cattle quarantine in effect against Grant and Luna counties would likely be raised. This quarantine was imposed on June 9, 1902, and was the result of an infection in Arizona and old Mexico. It will be remember that only a few months since the cattlemen of the two counties commenced the construction of a fence which would separate their stock from the infected district, and the action of the department has made the same unnecessary as all danger is at an end.

We take the above from the Silver City Independent. The Independent does not appear to know that the fence spoken of, has been constructed, and that the same was done by a few individuals who expect the cattlemen of the two counties to contribute toward the expense of its construction. For this reason we correct the statement of the Independent in order that the stockmen may not get a wrong impression in regard to the matter.

**A Little Early Riser.**

now and then, at bedtime will cure constipation, biliousness and liver troubles. Dewitt's Little Early Risers are famous little pills that cure by arousing the secretions, moving the bowels gently, yet effectually, and giving such tone and strength to the glands of the stomach and liver that the cause of the trouble is removed entirely, and if the use is continued for a few days, there will be no return of the complaint.—Sold by J. P. BYRON & SON.
